

Joonas Suuronen

Engineer, Programmer, Game Developer

I am 24-year-old fresh Information and Communication technology graduate (IT engineer). I always have had a huge passion for technology and science. Especially computers and programming have always fascinated me. I watch science, technology and programming related videos and streams daily. Also, I always have some sort of programming projects active (usually related to video games) that I love to work on. Most people know me as an honest, active and social individual. I tend to do everything immediately and never let tasks pile up.

WORK EXPERIENCE

Software Developer Metropolia, SAM-project

01/2022 - 11/2022

Began by making thesis on this subject, but I was hired to continue further. To simplify, the project is about creating an application for simulation of surveillance of autonomus vehicles.

Details

- UI / UX Development.
- Team management.
- Other various tasks.

Contact : Pekko Lindblom, project manager -

AI & ML

PERSONAL PROJECTS

Company: Banaani Games (01/2023 - Present)

- Also made website from scratch: www.banaanigames.com
- Mostly for selling my own game projects
- Can also sell various software services through the company

Various game projects (02/2019 - Present)

- Numerous game projects, mostly developed with Unity and C#.
- More serious project started late 2021 (WIP).
- Improved my full-stack skills by a huge margin.

ML / AI Game Director (2021)

- Machine learning artificial intelligence to direct events in a game.
- Made for client called Bigger Scope.
- Clusterizes playstyles and adapts to be more fun for each player.

Chess AI (2019)

- Basic console chess with C++.
- Minimax algorithm with Alpha-Beta pruning, easily wins humans.
- Player vs player, computer vs player, computer vs computer.
